# COMPUTER PARTS

MOTHERBOARD

A motherboard is one of the most important parts of a computer. It is the place where all computer parts talk to each other to make the computer work.
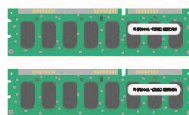

POWER SOURCE

Where the computer and its parts get energy.

HARD DRIVE

The long-term memory of a computer.

RAM

The short-term memory of a computer

CPU

A small square found on the motherboard that does what the computer's programs tells it to do and decides how fast the computer can do it.

PORTS

Where different parts of the computer connects.
